

Devon Lindsey

Web Developer

Personal Details

Name: Devon Lindsey

Phone: .415.513.5458

Email: devon.lindsey@gmail.com

Location: Oakland, CA (Bay Area)

About: I'm an excited and ambitious Javascript Developer by day; a robot lover, ReactJs evangelist, and dance off winner by night. In my free time, I teach CSS/HTML/JS to underprivileged youth and own the ReactJS bay area meetup, independently finding sponsors, locations and speakers for a once a month meetup that I MC. I love JS and all things related. I hope to make the web world a better place, one site at a time by teaching what I know, learning what I don't, and finding solutions where there are none. I believe in giving back to the community in any way possible and having fun while doing it.

More importantly, I love to laugh. If we all have a smile on our faces while we code, I promise there will be less technical debt.

Work Experience

2012 September - Present

Telmate

Senior Software Engineer

Creating web, mobile, tablet & kiosk applications used in facilitating inmate communication and facility staff supervision of inmates using ReactJs, AngularJs and all the other awesome web dev things.

Lead and mentor developers when necessary in JS, CSS and HTML.

Hardcore Google Analytics and resulting app changes based on findings.

Pixel perfect implementation queen, working hand in hand with designers.

Participate in teaching kids from Boys and Girls club programming and general technology strategies.

Organized first company meetup, many team building events, completely managed office move and construction project and continuing company "Brown bag Fridays."

2010 January - 2012 August

Switchfly (EzRez)

Senior Web Developer

Start with POJS and finish with AngularJS implementations as well as basic Java HTML templating.

Implemented & branded some of the largest airlines and financial institutions in the world working directly with clients.

Served as lead engineer on many projects, executing designs, estimates, managing client expectations and keeping team on track, never once finishing a single project past its deadline.

Received peer recognition award for exceeding expectations.

Functioned as company social chair, organizing social events and ordering schwag.

2007 September - 2010 January

Garmin International

Software Engineer - Web Services

POJS, ext, JQuery, Prototype, POCSS work on Garmin Connect Application

(connect.garmin.com), a web site allowing customers to organize, view and share the activities recorded from their exercise and outdoor devices.

Localization manager for the entirety of time at Garmin, coming up with complete strategy from back to front end to handle localized text, including custom Facelets taghandlers submitted to Facelets library.

Project or front end lead on many products and otherwise provided valuable front end expertise and guidance for those with less experience.

Knowledge & Skills

- Plain old Javascript
- ReactJs
- AngularJs
- BackboneJs
- Pretty much anything JS
- Googling things
- NPM/Node/Gulp/Bower/Yeoman
- CSS, CSS3, SASS, LESS
- HTML, HTML5
- Pixel perfect implementation
- Semantic Dom & OOCSS
- Natural leader
- UX design & layoutPRO version Are you a developer? Try out the HTML to PDF API pdfcrowd.com
- Enough Photoshop to get by
- Organizing & event planning
- Teaching & knowledge share
- Googling things

- Agile methodologies
- Git/Github/Gitlab
- Java, RoR, all languages are the same
- Not Databases
